# Round Table Card Game

## POINTS SYSTEM

- **2 – 10** = Points according to number on card
- **J = 12 PTS**
- **K = 15 PTS**
- **Q = 15 PTS**
- **A = 20 PTS**
- **JOKER** = All your Cards x2

## How to play

1. Shuffle the cards and put them face down. In class students sit around the table with cards and take turns drawing cards.
2. Let the students a few minutes, seconds or any determined time to give the answer to the question on their card. If a student gives the correct answer, then he/she keeps the card but if the student can't give the answer, the teacher takes back the card.
3. Students will keep drawing cards in several rounds until the first pile gets finish. At the end, the teacher should shuffle the cards he has collected and let students keep drawing and telling the answers.
4. At the end, students count their points according to the numbers on the cards. For example if you have a card with the number 2, you have 2 points. If your card has a 10, you have 10 points and so on.
5. Then the high point cards. **J= 12 PTS, K= 15PTS Q= 15 PTS, A = 20 PTS** then a **JOKER** = Doubles the points on all the cards you have.
